PROFESSIONAL SUMMARY

Full Stack Developer with almost 2 years of hands-on experience building production-grade applications using Next.js, Express.js, TypeScript, MongoDB, PostgreSQL and other cutting edge technologies.

Experienced in developing end-to-end systems including frontend interfaces, backend APIs, and real-time data pipelines. Strong exposure to AI/LLM-powered features, event-driven systems, and IoT-based architectures.

Deep understanding of SDLC concepts and methods, breaking requirements into structured deliverable features. Regularly leverage AI-assisted tools (Chatbots, AI-agents like Claude) to improve development speed, planning, and debugging.

Focused on clean architecture, validation, performance, and real-world problem solving in data-driven and automation-focused systems. I work with **responsibility and ownership**.

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer — Roots Beyond LLC(Texas, USA)

Remote | Jan 2026 — Present

- Designed, built and maintained full tech architecture of the business with multiple administrative and customer(B2B, B2C) facing applications, helped cross the **\$100,000** mark in sales.
- Enabled **business management** across inventory, multiple warehouse locations, orders, invoicing, billing, container/supply-chain logistics, sales commission tracking, AR/credit management, and reporting via my application.
- Worked with 3rd party services like **Stripe, Twilio, Shippo** etc for communication via Whatsapp and email, shipping label management.
- Built automated payment **reminders**, stock **alerts**, expiry **notifications**, and **marketing** campaigns, with Socket.IO for real-time updates.
- Managed **secure deployments** and reverse proxies across GitHub Actions, AWS ECR/ECS/S3, VPS, Nginx, Caddy, and Cloudflare, while auditing and remediating infrastructure security risks; hardened access with Tailscale, SSH keys, **firewalls**, Cloudflare origin **protection**, and Docker **isolation**.

Team Lead & Backend Developer, AI Team — Betopia Group (SM Technology)

Dhaka, Bangladesh | Jun 2025 — Dec 2025

- Developed **full-stack systems** with scalable backend APIs and responsive frontend applications
- I have **led and managed** a cross-functional **20 person team** including designers and developers for 2 months of my tenure.
- Integrated **AI/LLM-powered features** into production workflows
- Translated requirements into **structured implementations and feature workflows**
- Managed direct communication and dealing with **clients** from more than 6 countries including **Bangladesh, USA, UK, Ireland, Canada and India**
- My client communication and negotiations led to a **500% value increase** in the last project I touched there

SKILLS & TECHNOLOGIES

Backend & Systems: Node.js, Express.js, TypeScript, JavaScript, REST APIs, MongoDB, PostgreSQL, MySQL, Mongoose, Prisma, JWT, WebSocket, MQTT, Multer, Zod

Frontend: ReactJS, Redux, NextJS, Tailwind CSS, HTML, CSS, JavaScript, TypeScript

AI & LLM Integration: OpenAI API, LLM Integration, Prompt Engineering, Context Handling, AI-assisted Development

Architecture & Practices: MVC Architecture, Modular Design, Structured responses, Error Handling, DB Optimization practices

DevOps & Cloud: Docker, Nginx, Caddy, AWS, Hostinger, VPS Deployment, Git, Postman, Firebase, Vercel

Design tools: Figma

PROJECTS

FarmFlow: AI-Powered Smart Agriculture platform

Technologies: TypeScript, Node.js, Express.js, React, Next.js, MongoDB, InfluxDB, MQTT, Socket.io, ESP32, OpenRouter API etc

- Built **real-time** authenticated **telemetry** with Socket.IO and enabled **remote** irrigation and shading **control** from the dashboard.
- Developed AI **crop insights** combining live **sensor data**, soil composition, and 3-day weather forecasts.
- Implemented tiered **AI advisory** with **escalation** to verified agronomists for complex cases.
- Built an **AI-moderated** grower community with tri-state **content review** and field snapshots for chats and posts.
- Added **map-driven** field setup using **Leaflet**, with automated soil and weather data resolution.
- Designed **prompt workflows and response pipelines** for reliable AI integration
- Built backend modules for **user, field, and community management**

 <https://www.sajibofficial.me/projects/farmflow>

RootsBeyond: Distribution & Order Management System

Technologies: Node.js, Express.js, TypeScript, MongoDB, Zod, JWT, Multer, Puppeteer, XLSX, Docker

- Built a **full-stack system** for managing products, orders, and logistics
- Designed **validated REST APIs** with Zod
- Implemented **authentication and role-based access control**
- Developed **order lifecycle and tracking system**
- Built **bulk import/export pipelines** using XLSX
- Generated **PDF documents (invoices/reports)** using Puppeteer
- Deployed using **Docker + Nginx on VPS**

 (closed source, viewable only in live interviews)

EDUCATION

BSc in Computer Science & Engineering

Daffodil International University | 2021 — 2025

CGPA: 3.60 / 4.00

HSC: GPA 5.00 / 5.00

SSC JSC: GPA 5.00 / 5.00 (Government Scholarship Recipient in both)

COURSES & CERTIFICATIONS

- Complete Web Development — Programming Hero
- Next Level Web Development — Programming Hero
